Professor of Microbiology
Director, Medical Scholars Program

Dr. Anakk Sayeepriyadarshini
Associate Professor
Molecular & Integrative Physiology

Hanna Erickson
NRSA recipient & MD/PhD Student
Molecular & Integrative Physiology

The Graduate College invites students and postdoctoral researchers in the life and health-related sciences to an information session on the NIH National Research Service Award (NRSA), a.k.a. the Ruth L. Kirschstein Fellowship (F30, F31, & F32).

NRSAs provide up to five years of support for PhD students (F31), six years of support for MD/PhD students (F30), and three years of support for postdocs (F32). Applicants must be U.S. citizens, nationals, or permanent residents who are conducting research on topics relevant to NIH's institutes or centers.

The information session will offer an overview of the fellowship program and provide guidance on how to prepare a competitive proposal.

NRSA Annual Application Deadlines: April 8, August 8, and December 8.
