Neuropeptide Y and the amygdala: A model of stress resilience

Janice Urban, Ph.D.

Director, Center for Neurobiology of Stress
Resilience and Psychiatric Disorders
Chair, Discipline of Physiology & Biophysics
Rosalind Franklin University of
Medicine & Science

Tuesday, March 5th

4:00 pm at Beckman Institute 1005

Neuropeptide Y (NPY) is an endogenous peptide associated with resilience in rodents through humans. This presentation will discuss the novel neural mechanisms induced in the basolateral amygdala by NPY in a rodent model of stress resilience.

Next Tuesday, March 12, 2019
